Wastewater monitoring for SARS-CoV-2

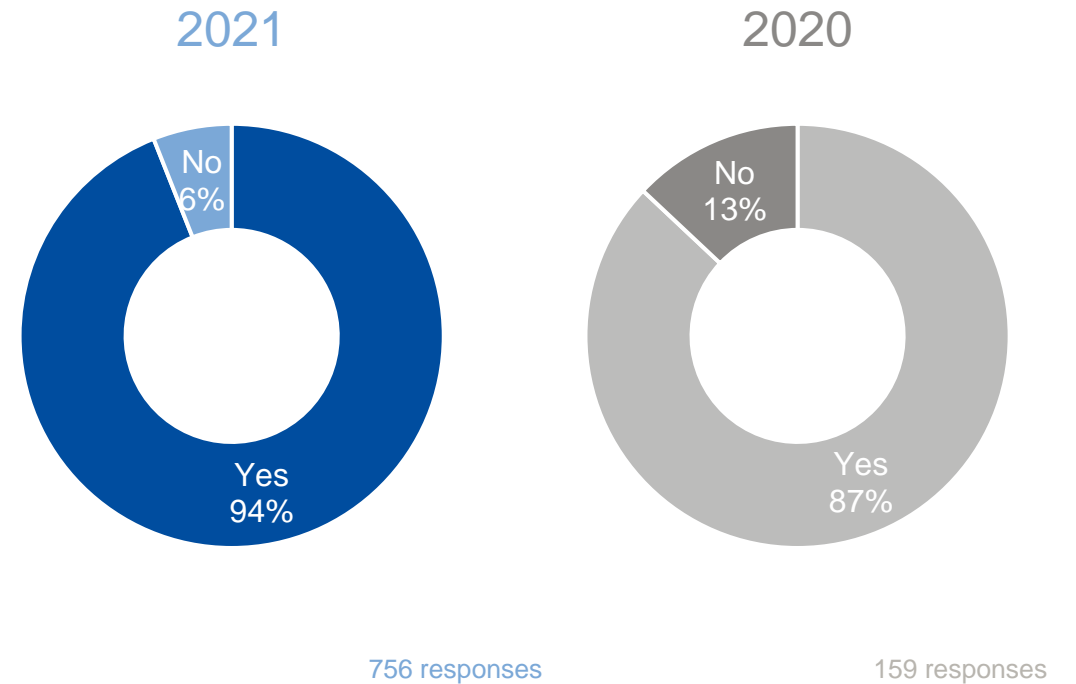

March 2021

Wastewater monitoring for SARS-CoV-2

What do you think is the most critical challenge in wastewater testing for SARS-CoV-2?

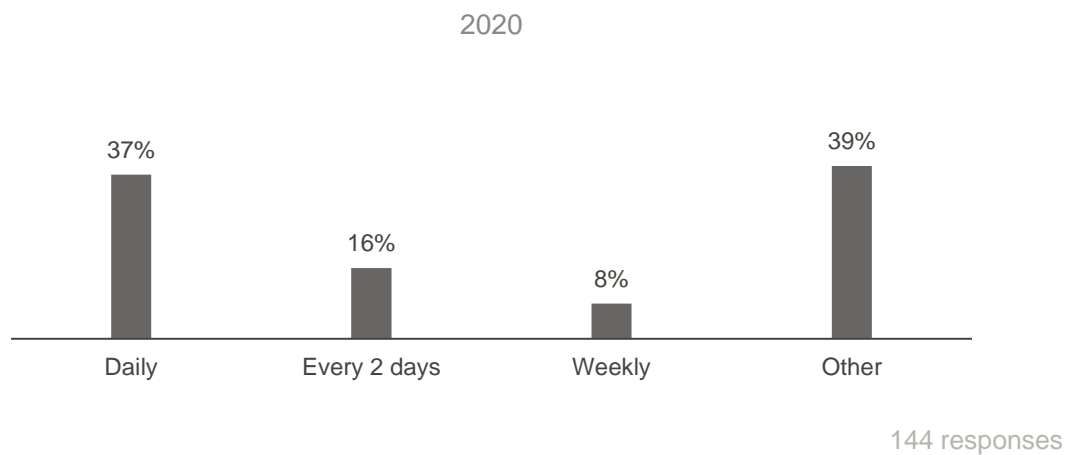

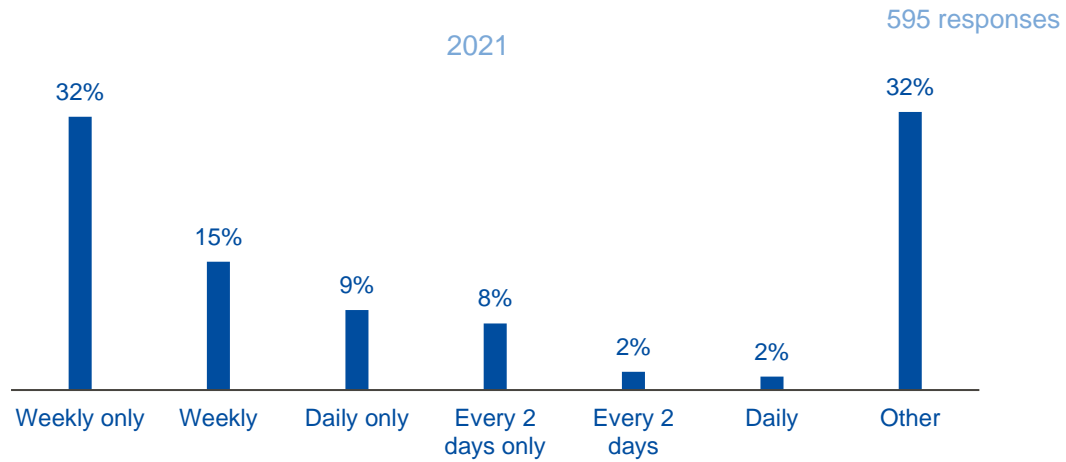

Should wastewater monitoring for SARS-CoV-2 become routine?

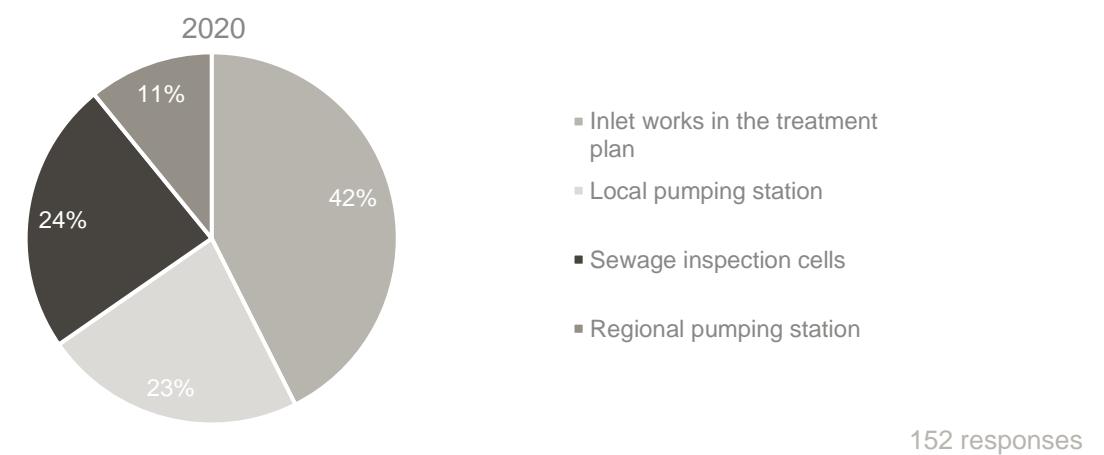

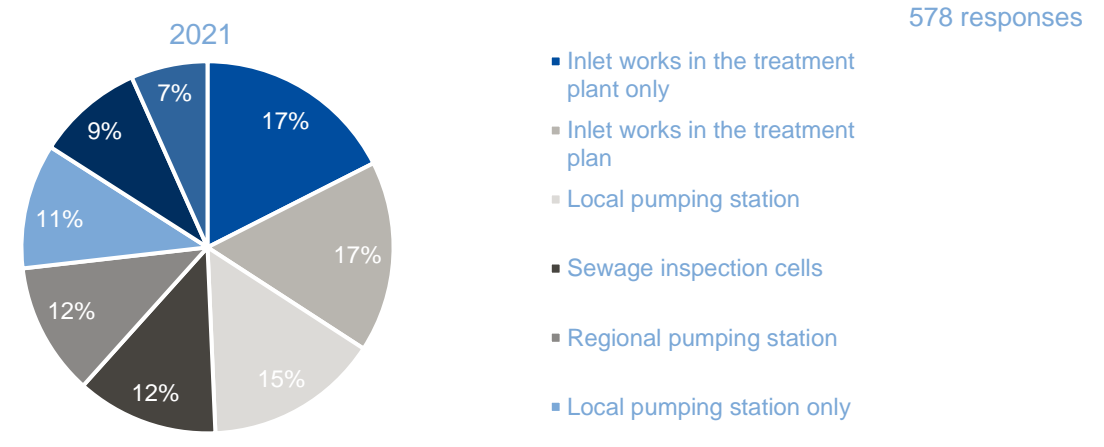

Sampling details

What is the frequency of wastewater collection for your lab?

Where are your wastewater samples collected?

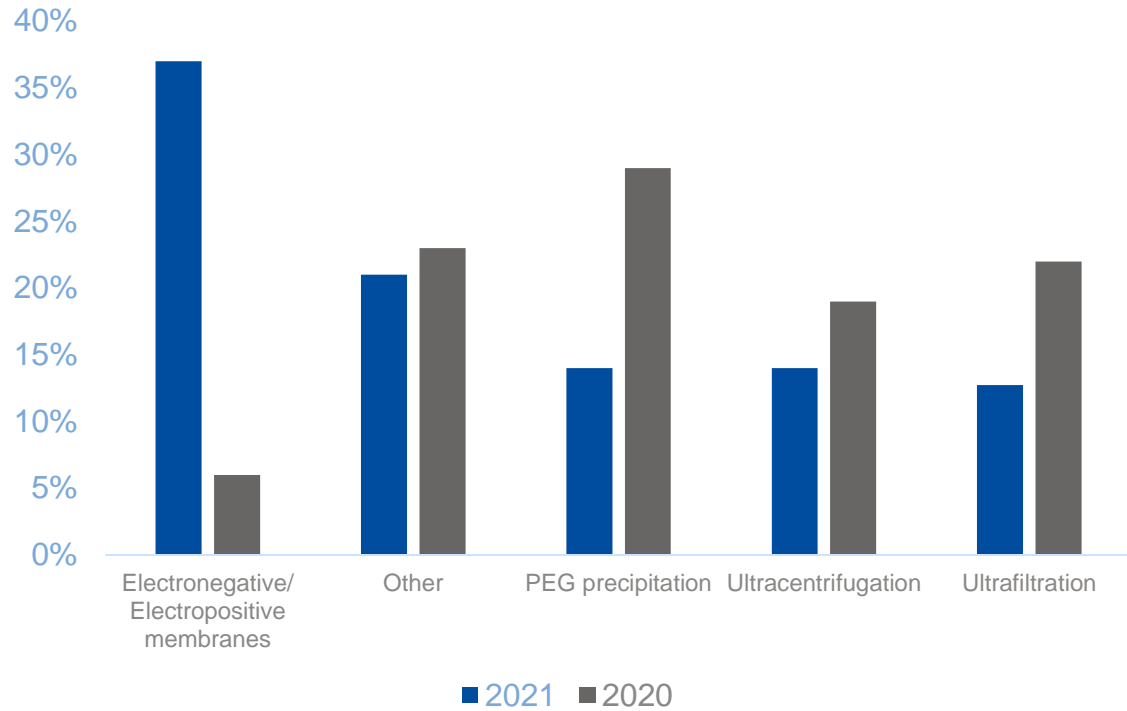

Sampling (continued)

Which sample type are you using or planning to use?

Preferred processing methods

What concentration method do you use?

756 responses
143 responses

What is your preferred detection method for SARS-CoV2 in wastewater?

756 responses
101 responses

Research aspect

In your opinion, which is the most important aspect for SARS-CoV-2 analysis?
