

New GeneGlobe® Design & Analysis Hub

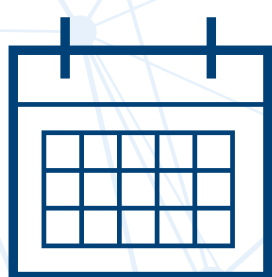

Empower your journey of discovery

Streamline your complete cycle of target exploration, product configuration, data analysis and follow-up experiments with just one tool – the new GeneGlobe Design and Analysis Hub

Supporting every phase of your experiment

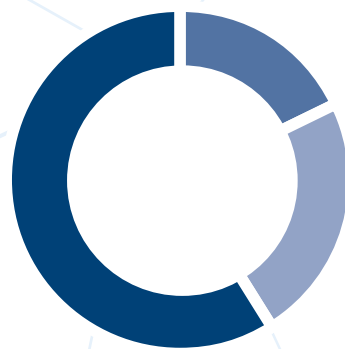

Access our trusted and comprehensive portfolio of NGS, PCR and functional analysis products coupled to manually curated target and pathway data

More than
10 years
supporting expert analysis

More than
100
NGS, PCR and functional analysis product families

More than
10,000
curated biological items

More than
15,000
publications mention GeneGlobe products
