

pQE-9 Vector

Positions of elements in bases

Vector size (bp)	3439
Start of numbering at XhoI (CTCGAG)	1–6
T5 promoter/lac operator element	7–87
T5 transcription start	61
6xHis-tag coding sequence	127–144
Multiple cloning site	145–170
Lambda <i>t_o</i> transcriptional termination region	186–280
<i>rrnB</i> T1 transcriptional termination region	1042–1140
ColE1 origin of replication	1616
β -lactamase coding sequence	3234–2374

pQE-9
