Take your lab to the next level

QIAlab® Consulting for optimized workflows

Lean operations for increased throughput without compromising quality

Quality results are a top priority for your lab. Every day you face operational challenges, such as increased workloads, decreased turnaround times and complex inventory procedures. Our expertise with Lean methods can help you maintain reliable, high-quality results while also improving throughput and performance.

Optimization gives you a performance edge in challenging time of limited resources and financial constraints. As a

leading provider of solutions from Sample to Insight®, we understand your dynamic needs and can give you access to our vast lab operation know-how.

The QIAlab Consulting Service offers an individual analysis of your processes in close collaboration with you. Together, we will identify critical steps and bottlenecks in your workflow to design and plan a strategy for continuous productivity and quality improvement.

Our QIAlab Consulting experts will help you:

Analyze and identify wasteful steps.
Develop measures and goals for improvement.

Measure the impact of the implemented actions and evaluate results, and adjust according to your goals.

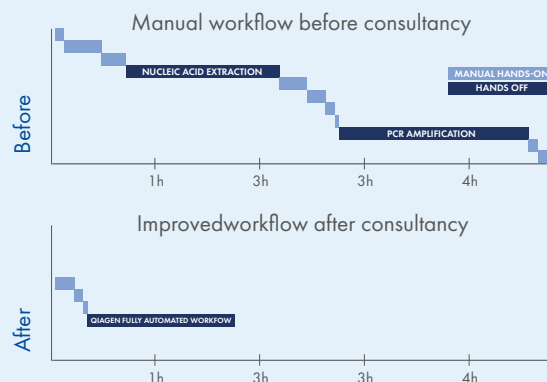

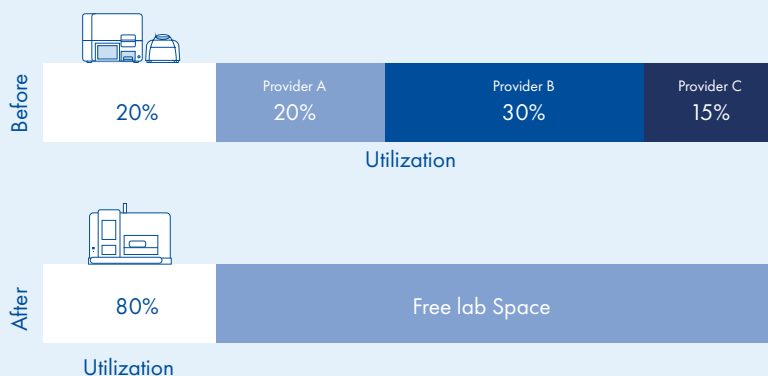

Implement defined measures enhancing your productivity.

Sustain and standardize your refined lab processes for continuous improvement.

We help you optimize your workflows while maintaining integrity and increasing efficiency.

Our QIALab Consulting experts will help you:

Example: Streamlined workflow with optimized instrument and space utilization

A QIALab Consulting Evaluation includes the analysis of your lab's current procedures and the need for standard workflow optimization. We provide a condensed evaluation report that also contains recommendations for improvement.

A QIALab Consulting Workshop includes two days of on-site visit by a QIAGEN expert. During the workshop, we assess your workflows together, identify bottlenecks, and implement customized strategies for improvement. We provide you with the outcome of the assessment and a comparison report to measure success.

Ordering Information

Product	Contents	Cat. no.
QIALab Consulting	Consultation support for lab workflow optimization, applying strategies and continuous improvement techniques based on Lean Management Methods, including a project to demonstrate potential optimized results.	9244719
NeuMoDx® Consultancy Evaluation	Consultancy Evaluation Service helps identify productivity improvement needs according to customer expectations and defined project plan.	9245453
NeuMoDx Consultancy Workflow	Consultancy Workflow Service includes Consultancy Evaluation and provides an overall workflow improvement model according to customer expectations.	9245451
