

Application Training – Protecting results, productivity and compliance

Application Training ensures laboratory staff are fully qualified, confident and compliant when operating QIAGEN instruments and workflows.

What is application training?

Application Training is a structured, hands-on session delivered by QIAGEN Application Specialists that is

- Customized to your workflows, assays and use cases
- Delivered by dedicated application experts
- Hands-on and outcome-based
- Documented and certifiable

Application Training ensures your team gets the most value from your QIAGEN system - safely, consistently and compliantly.

Application Training includes the following:

- Instrument hardware and software operation
- Workflow-specific assay review
- Run setup and best practices
- Data analysis and interpretation
- Troubleshooting and optimization
- Certification of completion (GMP/GLP compliant documentation)

When is Application Training recommended?

We provide Application Training with instrument installation, so our customers are proficient with the instrument and can confidently run their workflows from day one.

In addition to installation, Application Training is recommended when

- New lab staff are onboarded
- Existing staff need a refresher or recertification training
- Workflows or assays change
- New functionalities are added
- Audit readiness or compliance documentation is required
