## Important Note

### Change in Packaging of Nuclease-Free Water (5 liters)

Dear valued customer,

We would like to inform you that the packaging of Nuclease-Free Water (5 liters) (cat. no 129117) has permanently changed from a plastic bag with a luer cap to 5 x 1 liter bottles.

Due to the discontinuation of the plastic bag with luer cap that QIAGEN is normally using, on the part of the supplier, we are forced to supply Nuclease-Free Water (5 liters) in 5 x 1 liter bottles

This change does not affect product performance.

We apologize for any inconvenience this may have caused. If you have further questions, you can reach us by phone or get online support. For localized contact details, visit [www.qiagen.com/support](http://www.qiagen.com/support).

Best regards,  
QIAGEN
