## Important Note

EZ1&2® ccfDNA Kit (48) (cat. no. 954854)

Dear valued EZ1&2 ccfDNA Kit customer,

At QIAGEN, we are continuously striving to provide the highest level of performance with our instruments and protocols. Therefore, we are pleased to inform you that we minimized the variations in yield of ccfDNA samples obtained with the 45 µL elution volume protocols.

This improvement will be available in updated protocols with the upcoming Protocol Package version 11. Once available, the Protocol Package version 11 can be downloaded from the EZ2 Connect website, [www.qiagen.com/EZ2-Connect](http://www.qiagen.com/EZ2-Connect)

You may also scan the QR code to go to the EZ2 Connect product page.

For early access, please contact your local QIAGEN representative or our Technical Support Center at [support.qiagen.com](http://support.qiagen.com)

Thank you for your continued trust in our solutions.

Sincerely,

Your EZ2 Connect Team
