## Product Sheet

# CMV Probe ASR

### Contents

CMV DNA probe (13 $\mu$ M) in buffered solution	2 x 18 $\mu$ l
---	----------------

### Description

**Analyte Specific Reagent. Analytical and performance characteristics are not established.**

The CMV Probe ASR (cat. no. 1124264) contains a specific nucleic acid sequence for detection of Cytomegalovirus (CMV). The CMV Probe ASR is designed to detect a region of the MIE gene in the CMV genome. The DNA is synthetically derived.

### Storage conditions

Upon receipt, store the CMV Probe ASR at  $-30$  to  $-15^{\circ}\text{C}$ . Repeated thawing and freezing ( $> 2\times$ ) should be avoided, as this may reduce reagent performance. If the reagents are to be used intermittently, they should be frozen in aliquots. Storage at  $2-8^{\circ}\text{C}$  should not exceed a period of 5 hours.

### Handling instructions

Store the CMV Probe ASR away from any source of contaminating DNA, especially amplified DNA products. Use aerosol-barrier pipet tips for pipetting the CMV Probe ASR.

## Quality Control

This product was manufactured and released in accordance with the QIAGEN GmbH, Hilden, Quality Control and Quality Assurance procedures. The product has met QIAGEN GmbH, Hilden, quality requirements. Purity of the synthetic oligonucleotide is >80%, as determined by high-performance liquid chromatography (HPLC).

## Safety Information

When working with chemicals, always wear a suitable lab coat, disposable gloves, and protective goggles. For more information, please consult the appropriate safety data sheets (SDSs). These are available online in convenient and compact PDF format at [www.qiagen.com/safety](http://www.qiagen.com/safety), where you can find, view, and print the SDS for each QIAGEN kit and kit component.

Dispose of in accordance with local regulations.
